Summary

For long time I have been preferred freelance work, but now I see more opportunities to cultivate my knowledge and experience working as an employee in IT company.

Last 3 years I was working in ArtDepo studio as web-developer on 1C-Bitrix CMS, on EcomDev company developing templates for Magento CMS and developing heavy load project PeopleSmart.com on Svitla Systems and Inflection companies using .NET technologies.

Career Objective

I'm an experienced and ambitious web developer looking for a challenging new role in the IT industry with the opportunity to work with the latest front-end technologies on challenging and diverse projects.

Employment History

Svitla Systems / Inflection

*June 2014 - **Senior Front-End Developer***

*March 2013 – June 2014 - **Middle Front-End Developer***

Kiev, Redwood (California)

Responsibilities

Full time support "People Smart" project. Took part in developing front-end architecture.

Developing simple One Page Applications - in Backbone, AngularJS

Developing heavy load project on ASP.NET MVC (templates on Razor).

Creating mixins, architecture for SCSS styles for consolidation member area web-sites.

For 4 months has been working directly from USA (Redwood).

EcomDev

*April 2012 – March 2013 - **Middle Front-End Developer***

Kiev

Responsibilities

Developing high specification Magento eCommerce sites (Community & Enterprise) for a range of local, national & international clients.

I have created templates for more than 10 projects. On this job has improved my skills on JavaScript programming, MVC conception and teamwork.

Main technologies I used: PHP5/JS/HTML5/CSS3, Magento, Prototype (JavaScript Framework), Git. Browsers: IE7,8,9, Mozilla Firefox 3.5+, Chrome, Safari.

Art Depo Creative Studio

*July 2011 – April 2012 - **PHP Developer***
Kiev

Responsibilities

Took part in developing over 15 web-sites based on 1C-Bitrix CMS.

In 5 of them was chief web-developer. Was responsible for back-end and front-end.

Has been supported 1 heavy-loaded big project.

Was good in optimization web-sites on front-end - quick render and on server sites - adjusting apache/nginx/mysql servers.

Build, validate and maintain web page templates from supplied wireframe layouts using clean, lightweight, semantic HTML and CSS code that adheres to current Web Standards.

Code HTML and CSS.

Support and enforce best practices for content layout, navigation and site architecture for a complex eCommerce web application.

Creatively interpret established visual design standards to create new web interfaces

Resolve cross-browser incompatibilities between Internet Explorer (IE6, IE7, IE, Firefox, Safari, Chrome)

Work closely with designer, web manager, marketing strategist, content providers and programmers to ensure design quality and consistency of web pages.

About me

First of all I'm dad and lovely husband.

I'm front-end Developer in Svitla Systems and Inflection company. I love my job.

I very proud that took active part in development front-end architecture for a huge projects. In our project we use just modern technologies. I like write some technical stuff in my blog, project documentation.

Free time I spend with my family. Sometimes we go to enjoy nature, sometimes stay at home and play games (Monopoly, PlayStation).

I love sport. I'm very skilled in tennis. I am fan of pump it up.

My favourite films is Armagedon, Star Wars. Book - Harry Potter, Lord of the Rings.
